## Will Erect Ice Plant.

C. M. Secrist, of Chicago, manager of the Pacific Fruit Express Co., accompanied by J. Van Rensaler, of Supt. Parks' office in Omaha, spent Sunday in town, the object of Mr. Secrist's visit being to look over local conditions preparatory to the erection of an artificial ice plant next year. The Union Pacific has gone out of the refrigerating business, and has turned its ice houses over to the fruit express company, who will in the future look after the icing of its cars, which are now used almost exclusively on the Union Pacific. The express company figures that it can manufacture artificial ice cheaper than it can haul it from Laramie or Gothenburg, as has been done in the past, and even at less expense than though the crop was harvested from the lake east of town.

Mr. Secrist said the erection of the plant at North Platte is not a probability but an assured fact, and that it will be in operation to take care of all 1910 refrigerating. The present ice plant will be kept intact so far as now known, as it will be necessary to use part of the houses for storage purposes and all of the platform capacity for loading the ice into the cars.

## Considers Park Site.

After the session of the city council meeting Friday evening, the committee to which the park proposition made by Wm. E. Shuman was referred, met with Mr. Shuman and the park proposition was discussed. The suggestion was made that a larger tract ought to be secured for park purposes and Mr. Shuman offered the city a tract containing a little more than eleven acres extending from Second to Fourth streets and just eight blocks from Dewey street. This tract was offered to the city for \$2,000, part payable this year and part payable in a year.

This proposition will no doubt be taken up and be disposed of at the next regular meeting of the city council. Twenty years ago The Tribune urged the purchasing of park sites and regrets that no such action was taken at that time. The Tribune believes that the offer of eleven acres should be accepted by the council and a park established.

## Enforce the Ordinance.

Bicycle riders no longer observe the ordinance relating to riding on sidewalks—they do not carry lighted lamps neither do they dismount when approaching a pedestrian. A few evenings ago P. A. Norton was run into by a Jap rider with such force as to throw him off the walk, tear his clothing and bruise his body considerably. He captured the wheel, took it home and is now waiting for the Jap to come and claim his wheel.

Mr. Norton's experience is one of a number that have recently occurred, in fact they are so frequent as to call for a rigid enforcement of the ordinance relating to bicycle riders.

## "SHOW ME"

While probably only a small percentage of prospective purchasers of mowing machines are born in the state of Missouri, there seems to be no remark that applies more perfectly to the condition of mind of mower buyers than the one that is nationally associated with the state of Missouri, "Show me." In no other way do the majority of us get so good an idea of an article or proposition as by seeing. Prospective mower buyers come in and see the old reliable Standard Mower. It was the best mower fifty years ago and it is the best today. We carry all sizes of the mower and rake.

Yours for the Mower trade,

# Workman & Derryberry.
